PROFESSIONAL SUMMARY

Every project I've touched has pulled me somewhere I didn't expect — a travel website became a DNS and SEO rabbit hole, a facial recognition idea became a published paper, and 'let me try n8n' became five LLMs collaborating in one workflow. I build to understand, not just to finish. I'm always chasing the next thing, and I work best when the problem is hard enough to keep me up at night.

EDUCATION

Dr Shakuntala Misra National Rehabilitation University

Lucknow, UP, India

B.Tech – Computer Science & Engineering | Expected Dec 2026 | SGPA: 7.8

- Coursework: Data Structures & Algorithms, Web Technology, Soft Computing, Digital Electronics, DBMS, Discrete Mathematics

DAV Public School, Kailash Hills

New Delhi, India

Class XII – CBSE · 75% | Class X – CBSE · 89%

TECHNICAL SKILLS

AI Agents & Automation: n8n, AI Agent Design, LLM Integration, OpenRouter, Prompt Engineering, Workflow Automation, Multi-Agent Systems

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frontend / Backend: React, Node.js, Express.js, REST APIs, EmailJS, Razorpay

Databases: SQL, MySQL, CSV Processing, Data Manipulation

ML / Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Feature Engineering

DevOps / Tools: Git, GitHub, Cloudflare Workers, GoDaddy DNS, Google Search Console, VS Code

Competencies: SEO Optimization, API Integration, Responsive Design, End-to-End Deployment

CERTIFICATIONS

Data Science & AI: Data Analysis with Python – IBM | Python for Data Science & AI – IBM | Python for Data Analysis: Pandas & NumPy – Coursera | GenAI Powered Data Analytics – TATA/Forage

Web & Programming: HTML and CSS in Depth – Meta | Programming with JavaScript – Meta | Crash Course on Python – Google | Introduction to Python – Infosys Springboard

Development & Tools: DSA in Python (20 hrs) – Udemy | SQL for Data Analysis (7.5 hrs) – Udemy | Python Dev & Data Science – Udemy | GenAI for Professionals (8.5 hrs) – Udemy | Corporate Communications – Starweaver/Coursera

RESEARCH & PUBLICATIONS

Facial Expression Recognition Using MediaPipe Landmarks & 3D-CNN

Mar 2026

Presented / Co-Author – NCMPCS-2026, FOET, DSMNRU, Lucknow

- Proposed a real-time mental health monitoring system combining MediaPipe facial landmark extraction with a 3D-CNN architecture for expression classification.
- Presented at the National Conference on Machine Learning and Predictive Analytics Using Computational Sciences, Dept. of CSE, March 10, 2026.

EXPERIENCE

Data Science Intern

Jul 2025

SkillCraft Technology · MSME | ID: SCT/JUL25/4103 · Remote

- Applied end-to-end data workflows including data cleaning, EDA, feature engineering, and ML model building using Python, Pandas, NumPy, and Scikit-learn.
- Produced visual analytical reports using Matplotlib and Seaborn to surface data-driven insights.

AI / Machine Learning Intern

Jun – Jul 2025

Edunet Foundation – AICTE · Remote

- Engineered an end-to-end ML pipeline achieving 85%+ accuracy comparing Linear Regression, Random Forest, and Gradient Boosting via cross-validation.
- Applied feature engineering, data preprocessing, and model evaluation (R^2 , RMSE, MAE) within a 6-week AICTE SkillBuild program.

Web Developer Intern

Jun – Jul 2025

- Developed responsive UI components using CSS Grid and Flexbox; improved mobile load performance through asset minification, lazy loading, and efficient DOM manipulation.

Python Programming Intern

May – Jul 2025

EASYSYSTEMS SERVICES · Remote

- Completed 8-week mentor-guided Python internship focused on practical application development and project reporting.

PROJECTS

PawanPutra Travel — pawanputratravel.in JavaScript, HTML, CSS, EmailJS, Razorpay	2025
• Designed, built, and deployed a live revenue-generating car rental & travel agency website with Razorpay payment gateway and EmailJS-powered automated customer communication. • Architected modular JS codebase (7+ sections) with smooth scrolling, mobile navigation, form validation, and automated reply templates. • Configured custom domain via Cloudflare Workers, resolved CNAME conflicts, and updated GoDaddy nameservers — 9 pages indexed on Google Search Console.	
AI Agent & n8n Workflow Automation n8n, OpenRouter, LLMs, Prompt Engineering	2025–2026
• Designed and deployed multi-LLM agent workflows integrating ChatGPT, Claude, Gemini, Llama, and Mixtral into unified pipelines with multiple collaboration modes. • Built real-world automation connecting LLM agents to external APIs and triggers — enabling end-to-end task automation without manual intervention. • Integrated Kimi K2.5 via OpenRouter; hands-on experience with API key management, model routing, and agent orchestration.	
AnimePath — Anime Discovery & Community Platform HTML, CSS, JavaScript, Jikan API	2024–2025
• Built a multi-page anime discovery platform inspired by AniList with a dark card-based UI, anime tracking, and a rating system. • Implemented localStorage persistence for user tracking lists and integrated Jikan API for real-time anime data fetching.	
Employee Salary Prediction System Python, Scikit-learn, Pandas, NumPy, Matplotlib	2024–2025
• Built end-to-end ML pipeline predicting salaries from experience, education, job role, and company size — achieving 85%+ accuracy. • Compared Linear Regression, Random Forest, and Gradient Boosting; selected best model using R², RMSE, and MAE with full EDA and Seaborn visualizations.	
Portfolio Builder for Freelancers HTML, CSS, JavaScript, Responsive Design	2024–2025
• Designed fully responsive portfolio builder using CSS Grid/Flexbox optimized for desktop, tablet, and mobile. • Built modular, customizable codebase with lazy loading, minified assets, and smooth JS animations for fast load performance.	

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native)

Interests: Chess, Photography, Reading, Open Source Contribution, Web Development, AI Automation
